

## SUMMATION NOTATION

ECON 340: ECONOMIC RESEARCH METHODS

INSTRUCTOR: DIV BHAGIA

The capital sigma ( $\Sigma$ ) stands for summing everything on the right.

$$\sum_{i=1}^N X_i = X_1 + X_2 + \dots + X_N$$

Things you CAN do to summations:

1. Pull constants out of them, or into them.

$$\sum_{i=1}^N bX_i = b \sum_{i=1}^N X_i$$

2. Split apart (or combine) sums (addition) or differences (subtraction)

$$\sum_{i=1}^N (bX_i + cY_i) = b \sum_{i=1}^N X_i + c \sum_{i=1}^N Y_i$$

3. Multiply through constants by the number of terms in the summation

$$\sum_{i=1}^N (a + bX_i) = aN + b \sum_{i=1}^N X_i$$

Things you CANNOT do to summations:

1. Split apart (or combine) products (multiplication) or quotients (division).

$$\sum_{i=1}^N X_i Y_i \neq \sum_{i=1}^N X_i \times \sum_{i=1}^N Y_i$$

2. Move the exponent out of or into the summation.

$$\sum_{i=1}^N X_i^a \neq \left( \sum_{i=1}^N X_i \right)^a$$

Exercise:

$$X = \{2, 9, 6, 8, 11, 14\} \quad Y = \{7, 1, 3, 5, 0\}$$

$$1. \sum_{i=1}^4 X_i =$$

$$2. \sum_{i=1}^4 2X_i =$$

$$3. \sum_{i=1}^4 (X_i + 4) =$$

$$4. \sum_{i=1}^3 (X_i + Y_i) =$$

$$5. \sum_{i=1}^2 X_i Y_i =$$

$$6. \sum_{i=1}^2 X_i \times \sum_{i=1}^2 Y_i =$$

$$7. \sum_{i=1}^2 X_i^2$$
